VOLUME 32 · SUBJECT INDEX

A

Aconitase, Hereditary myopathy with lactic acidosis, succinate dehydrogenase and aconitase deficiency in northern Sweden: a genealogical study, **344**

Acute intermittent porphyria, Four mutations in the porphobilinogen deaminase gene in patients with acute intermittent porphyria, **979**

Adolescents, Adolescents' opinions about genetic risk information, prenatal diagnosis, and pregnancy termination, **799**: comment, **805**: *letter*, **836**

Agammaglobulinaemia, A new point mutation involving a highly conserved leucine in the Btk SH2 domain in a family with X linked agammaglobulinaemia: *letter*, **77**

Aicardi-Goutières syndrome, The Aicardi-Goutières syndrome (familial, early onset encephalopathy with calcifications of the basal ganglia and chronic cerebrospinal fluid lymphocytosis): *syndrome of the month*, **881**

Alagille syndrome
- Alagille syndrome: family studies, **264**
- Alagille syndrome: is the face specific? **148** *ptr*

Åland Island eye disease (ÅIED), Duchenne muscular dystrophy: negative electroretinograms and normal dark adaptation. Reappraisal of assignment of X linked incomplete congenital stationary night blindness, **348**

Albinism, Oculocutaneous albinism among schoolchildren in Harare, Zimbabwe, **859**

Aldosteronism, Description of two families in the north east of Scotland with glucocorticoid remediable aldosteronism, **137** *abs*

Allele distribution, Allele distribution of a highly polymorphic repeat on chromosome 12 in patients with symptoms of chorea and ataxia: *letter*, **577**

Allele loss, Rapid detection of rare variants and common polymorphisms in the APC gene by PCR-SSCP for presymptomatic diagnosis and showing allele loss, **568**

Alzheimer's disease
- Apolipoprotein E4 allele is not associated with sporadic Alzheimer's disease in British Asians, **151** *ptr*
- Apolipoprotein E ε4 allele is a risk factor for familial and sporadic presenile Alzheimer's disease in both homozygote and heterozygote carriers, **642**

Amniocytes, Difference in constitutive heterochromatin behaviour between human amniocytes and lymphocytes detected by a sequential in situ exonuclease III digestion-random primer extension procedure, **32**

Amniotic fluid cell cultures, Detection of maternal cell contamination in amniotic fluid cell cultures using fluorescent labelled microsatellites, **61**

Amplification mismatch deletion, Detection of germline mutations in the RB1 gene using amplification mismatch detection analysis and direct sequencing of PCR products, **154** *ptr*

Amyloid polyneuropathy, A new transthyretin variant (Ser 24) associated with familial amyloid polyneuropathy, **279**

Amyotrophic lateral sclerosis
- Familial amyotrophic lateral sclerosis/motor neurone disease (FALS): a review of current developments, **841**
- Screening for Cu/Zn superoxide dismutase gene mutations in familial and sporadic cases of amyotrophic lateral sclerosis, **152** *ptr*
- Superoxide dismutase mutations in an unselected cohort of Scottish amyotrophic lateral sclerosis patients, **290**

Androgen receptor, The role of the androgen receptor in male sexual differentiation, **135** *abs*

Angelman syndrome
- A case of Angelman syndrome arising as a result of a de novo Robertsonian 15/15 translocation, **154** *ptr*
- Comparison of microsatellite and methylation studies for the diagnosis of Prader-Willi and Angelman syndrome, **154** *ptr*
- Molecular and fluorescence in situ hybridisation (FISH) studies of supernumerary marker 15 chromosomes, **138** *abs*

Aniridia, A new PAX6 mutation in familial aniridia, **488**

Ankylosing spondylitis, HLA-B27 and spondyloarthropathy: value for early diagnosis? *review article*, **497**

Anonychia, Anonychia and absence/hypoplasia of distal phalanges (Cooks syndrome): report of a second family, **638**

Anophthalmia, Anophthalmia with cleft palate and micrognathia: a new syndrome or an unusual presentation of Rubinstein-Taybi syndrome? *letter*, **668**

Antenatal carrier screening, Antenatal carrier screening for cystic fibrosis: randomised trial of stepwise *v* couple screening, **140** *abs*

Antenatal video counselling, Antenatal video counselling for maternal serum screening is an effective method of communication, **150** *ptr*

Anterior horn cell disease, Lethal congenital contracture syndrome (LCCS), a fetal anterior horn cell disease, is not linked to the SMA 5q locus, **36**

APC gene
- Cranial desmoid tumour as the first presentation of familial adenomatous polyposis and the demonstration of the role of the APC gene in the pathogenesis of this tumour, **145** *ptr*
- FAP patients with complete deletions of the APC gene, **146** *ptr*
- Mutation detection in the APC gene by heteroduplex analysis following RT PCR, **146** *ptr*
- Rapid detection of rare variants and common polymorphisms in the APC gene by PCR-SSCP for presymptomatic diagnosis and showing allele loss, **568**

APC gene mutations, Genotype-phenotype correlations of new causative APC gene mutations in patients with familial adenomatous polyposis, **728**

Apolipoprotein E4, Apolipoprotein E4 allele is not associated with sporadic Alzheimer's disease in British Asians, **151** *ptr*

Apolipoprotein E4 allele, Apolipoprotein E ε4 allele is a risk factor for familial and sporadic presenile Alzheimer's disease in both homozygote and heterozygote carriers, **642**

Argentina, Identification of RB1 germline mutations in Argentinian families with sporadic bilateral retinoblastoma, **475**

Arrays, FMR1 triplet arrays: paying the price for perfection: *review article*, **761**

Ataxia, Allele distribution of a highly polymorphic repeat on chromosome 12 in patients with symptoms of chorea and ataxia: *letter*, **577**

Ataxia telangiectasia, The Nijmegen breakage syndrome is not an allelic form of ataxia telangiectasia, **149** *ptr*

Attitudes, Attitudes towards Down's syndrome: follow up of a cohort of 280 cases, **597**

Australia, The impact of newborn screening on cystic fibrosis testing in Victoria, Australia, **537**

Autism, Association study with two markers of a human homeogene in infantile autism, **269**

Autosomal dominance, Cluster headache is an autosomal dominantly inherited disorder in some families: a complex segregation analysis, **954**

Autosomal dominant optic atrophy, No evidence of genetic heterogeneity in dominant optic atrophy, **951**

Autosomal dominant retinitis pigmentosa, Autosomal dominant retinitis pigmentosa locus on chromosome 19q in a Japanese family, **915**

Autosomal genes, Estimate of severe autosomal recessive limb-girdle muscular dystrophy (LGMD2C, LGMD2D) among sporadic muscular dystrophy males: a study of 415 families, **930**

Autosomal recessive disorder, Absence/hypoplasia of tibia, polydactyly, retrocerebellar arachnoid cyst, and other anomalies: an autosomal recessive disorder, **896**

Azerbaijan, Thalassaemia in Azerbaijan: *letter*, **245**

B

Bali, Congenital non-syndromal autosomal recessive deafness in Bengkala, an isolated Balinese village, **336**

Barth syndrome, X linked fatal infantile cardiomyopathy maps to Xq28 and is possibly allelic to Barth syndrome, **383**

Basal ganglia, The Aicardi-Goutières syndrome (familial, early onset encephalopathy with calcifications of the basal ganglia and chronic cerebrospinal fluid lymphocytosis): *syndrome of the month*, **881**

Becker muscular dystrophy, Deletion patterns of Duchenne and Becker muscular dystrophies in Greece, **48**

Best's vitelliform macular dystrophy, Evidence for genetic heterogeneity in Best's vitelliform macular dystrophy, **855**
Bipolar affective disorder, A weak association between TH and DRD2 genes and bipolar affective disorder in a Spanish sample, **131**
Bladder tumours, Molecular pathology of the RB1 gene in retinoblastoma, breast and bladder tumours, **155** *ptr*
Blepharophimosis, Cytogenetic findings indicate heterogeneity in patients with blepharophimosis, epicanthus inversus, and developmental delay, **19**
Blepharophimosis-mental retardation syndrome, Blepharophimosis-mental retardation syndrome and terminal deletion of chromosome 3p: *letter*, **245**
Blepharophimosis-ptosis, Linkage studies in two families with blepharophimosis-ptosis confirms linkage to 3q21-3q23, **152** *ptr*
Blepharophimosis-ptosis syndrome, Linkage analysis in blepharophimosis-ptosis syndrome confirms localisation to 3q21-24, **774**
Blue rubber bleb naevus syndrome, A gene for familial venous malformations maps to chromosome 9p in a second large kindred, **197**
Bobrow M, Professor Martin Bobrow: biographical note, **410**
Bone marrow grafts, The use of microsatellite markers in monitoring the progression of bone marrow grafts in patients with severe combined immunodeficiency syndrome, **154** ptr
Book reviews
Abramsky L, Chapple J, *editors*. Prenatal diagnosis: the human side, **998**

Wassarman PM, DePamphilis ML, *editors*. Guide to techniques in mouse development. Methods in enzymology volume 225, **248**
Wolff JA, *editor*. Gene therapeutics. Methods and applications of direct gene transfer, **158**
Wright AD, Jay B, *editors*. Molecular genetics of inherited eye disorders, **583**
BPES syndrome, Cytogenetic findings indicate heterogeneity in patients with blepharophimosis, epicanthus inversus, and developmental delay, **19**
Brachydactyly
Brachydactyly and mental retardation: a new haploinsufficiency syndrome, **144** *abs*
Evaluation of candidate genes for familial brachydactyly, **851**
Branchio-oto-renal syndrome, Otofaciocervical syndrome: a sporadic patient supports splitting from the branchio-oto-renal syndrome, **816**
Brazil, Myotonic dystrophy: genetic, clinical, and molecular analysis of patients from 41 Brazilian families, **14**
BRCA2, A large multisite cancer family is linked to BRCA2, **982**
Breast cancer
A large multisite cancer family is linked to BRCA2, **982**
Attitudes to predictive testing for BRCA1, **140** *abs*
Factors influencing decisions on whether to proceed with predictive testing for breast/ovarian cancers, **140** *abs*
Identification of women at high genetic risk of breast cancer through the National Health Service Breast Screening Programme (NHSBSP), **862**
Molecular pathology of the RB1 gene in retinoblastoma, breast and bladder tumours, **155** *ptr*
The impact of genetic counselling on risk perception in women with a family history of breast cancer, **139** *abs*
Use of linked markers in breast/ovarian cancer families, **145** *ptr*
Bruton's tyrosine kinase SH2 domain, A new point mutation involving a highly conserved leucine in the Btk SH2 domain in a family with X linked agammaglobulinaemia: *letter*, **77**

C
Caenorhabditis elegans, The *Caenorhabditis elegans* approach to genome analysis, **136** *abs*
Café au lait spots, Familial café au lait spots: a variant of neurofibromatosis type 1, **985**
CAG repeat, Characterisation of the unstable expanded CAG repeat in the MJD1 gene in four Brazilian families of Portuguese descent with Machado-Joseph disease, **827**
CAG triplet repeat, Sequence analysis of the CCG polymorphic region adjacent to the CAG triplet repeat of the HD gene in normal and HD chromosomes, **399**
Campomelic dysplasia, A clinical and genetic study of campomelic dysplasia, **415**
Cancer family
Cancer families: what risk are they given and do the risks affect management? **139** *abs*
Large multisite cancer family is linked to BRCA2, **982**
Cancer predisposition, Genetic testing for cancer predisposition: need and demand: *annotation*, **161**
Candidate gene, De novo 1;10 balanced translocation in an infant with thanatophoric dysplasia: a clue to the locus of the candidate gene, **293**
Cardiac defect, An autosomal recessive syndrome of cleft palate, cardiac defect, genital anomalies, and ectrodactyly (CCGE), **72**
Cardiomyopathy, X linked fatal infantile cardiomyopathy maps to Xq28 and is possibly allelic to Barth syndrome, **383**

Cardiovascular calcifications, Unusual expression of Gaucher's disease: cardiovascular calcifications in three sibs homozygous for the D409H mutation, **740**
Carrier screening
Direct marketing of cystic fibrosis carrier screening: commercial push or population need? *editorial*, **249**: *letter*, **758**
Extending availability of haemophilia A carrier detection to all families with haemophilia, **152** *ptr*
Inversions in the factor VIII gene: improvement of carrier detection and prenatal diagnosis in Dutch haemophilia A families, **296**
Stepwise or couple antenatal carrier screening for cystic fibrosis?: women's preferences and willingness to pay, **282**
Cartilage-hair hypoplasia, Cartilage-hair hypoplasia: *syndrome of the month*, **39**
Cartilage matrix protein, Exclusion of retinoic acid receptor and a cartilage matrix protein in non-syndromic CL(P) families: *letter*, **78**
Cataract
An unusual pedigree with microcornea-cataract syndrome, **813**
Ascertainment of myotonic dystrophy through cataract by selective screening, **144** *abs*, **519**
Bilateral cataract and high serum ferritin: a new dominant genetic disorder?, **778**
CCG polymorphic region, Sequence analysis of the CCG polymorphic region adjacent to the CAG triplet repeat of the HD gene in normal and HD chromosomes, **399**
CCGE syndrome, An autosomal recessive syndrome of cleft palate, cardiac defect, genital anomalies, and ectrodactyly (CCGE), **72**
Cell cycle regulation, Cell cycle regulation and signal transduction mechanisms in yeast: the relevance to human disease, **136** *abs*
Central nervous system tumours, Congenital anomalies and genetic disorders in families of children with central nervous system tumours, **627**
Cerebellar atrophy, Cerebellar atrophy in a patient with velocardiofacial syndrome, **561**
CF phenotype, Mild cystic fibrosis phenotype in patients with the 3272-26A>G mutation: *letters*, **406, 919**
CFTR gene, High incidence of ΔI507 mutation of the CFTR gene in a limited area of the north west of France: *letter*, **577**
CGG repeat, Instability of the CGG repeat at the FRAXA locus and variable phenotypic expression in a large fragile X pedigree, **907**
Characteristics, Public attitudes towards the selection of desirable characteristics in children, **796**
Charcot-Marie-Tooth disease
Connexin 32 mutations in X linked dominant Charcot-Marie-Tooth disease, **137** *abs*
Inheritance of CMT1A duplication from a mosaic father, **483**
Charcot-Marie-Tooth disease type 1A, Assignment of microsatellite sequences to the region duplicated in CMT1A (17p12): a useful tool for diagnosis, **231**
Children
GIG response to the UK Clinical Genetics Society report "The genetic testing of children": *letter*, **490**
Response to GIG's response to the UK Clinical Genetics Society report "The genetic testing of children": *letter*, **838**
The genetic testing of children: *letter*, **492**
CHIME syndrome, Neuroectodermal (CHIME) syndrome: an additional case with long term follow up of all reported cases, **465**
China, DNA analysis of Huntington's disease in southern Chinese, **120**
Chinese, A comparison of the Huntington's disease associated trinucleotide repeat between Chinese and white populations: *letter*, **404**
Chinese law, Redrafted Chinese law remains eugenic: *editorial*, **409**
Cholinesterase variants, Cholinesterase variants: rapid characterisation by PCR/SSCP and evidence for molecular homogeneity, **109**
Chondrodysplasia, Cartilage-hair hypoplasia: *syndrome of the month*, **39**
Chorea, Allele distribution of a highly polymorphic repeat on chromosome 12 in patients with symptoms of chorea and ataxia: *letter*, **577**
Chorionic villi, Pallister-Killian syndrome: normal karyotype in prenatal chorionic villi, in postnatal lymphocytes, and in slowly growing epidermal cells, but mosaic tetrasomy 12p in skin fibroblasts, **68**
Chromosomal localisation, Chromosomal localisation of a Y specific growth gene(s), **572**
Chromosome abnormalities
Allele distribution of a highly polymorphic repeat on chromosome 12 in patients with symptoms of chorea and ataxia: *letter*, **577**
Association between high serum total IgE levels and D11S97 on chromosome 11q13 in Japanese subjects, **363**
Autosomal dominant retinitis pigmentosa locus on chromosome 19q in a Japanese family, **915**
Bilateral split hand/foot malformation and inv(7)(p22q21.3), **375**
Blepharophimosis-mental retardation syndrome and terminal deletion of chromosome 3p: *letter*, **245**
Chromosome 13q deletion with Waardenburg syndrome: further evidence for a gene involved in neural crest function on 13q, **531**
Chromosome 1p terminal deletion: report of new findings and confirmation of two characteristic phenotypes, **619**
Chromosome painting of radiation induced micronuclei, **139** *abs*
Clinical features of nine males with molecularly defined deletions of the Y chromosome long arm, **711**
Congenital knee dislocation in a 49,XXXXY boy, **309**
Cytogenetic findings indicate heterogeneity in patients with blepharophimosis, epicanthus inversus, and developmental delay, **19**
De novo 1;10 balanced translocation in an infant with thanatophoric dysplasia: a clue to the locus of the candidate gene, **293**
Del(3)(p25.3) without phenotypic effect, **994**
Detecting deletions in the critical region for lissencephaly on 17p13.3 using fluorescent in situ hybridisation and a PCR assay identifying a dinucleotide repeat polymorphism, **275**
Detection of Y mosaicism in patients with Turner's syndrome: *letter*, **578**
Developmental delay and dysmorphic features associated with a previously undescribed deletion on chromosome 1, **636**
Difference in constitutive heterochromatin behaviour between human amniocytes and lymphocytes detected by a sequential in situ exonuclease III digestion-random primer extension procedure, **32**
Double non-disjunction in maternal meiosis II giving rise to a fetus with 48,XXX,+21, **650**
Duplication 2 (q11.2-q21): a previously unreported abnormality, **825**
Exclusion mapping of chromosomal regions which cross hybridise to FSHD1A associated markers in FSHD1B, **770**
Familial partial trisomy 8p without dysmorphic features and only mild mental retardation, **792**
Familial Xp+ chromosome, dup(Xq26.3→qter), **891**
Family with autosomal dominant polycystic kidney disease linked to 4q21-23: *letter*, **493**
Fetus with an X;1 balanced reciprocal translocation and eye disease, **557**
Further delineation of the partial proximal trisomy 10q syndrome, **968**
Gene for familial venous malformations maps to chromosome 9p in a second large kindred, **197**
Genetic refinement of the chromosome 5q lattice corneal dystrophy type I locus to within a 2 cM interval, **224**
Good growth response to growth hormone treatment in the ring chromosome 15 syndrome, **486**
Hamartomas from patients with tuberous sclerosis show loss of heterozygosity for chromosome 9q34, **152** *ptr*
Hereditary multi-infarct dementia unlinked to chromosome 19q12 in a large Scottish pedigree: evidence of probable locus heterogeneity, **57**
Human Genetic and Chromosome Abnormality Register, **139** *abs*
Identification of an unbalanced cryptic translocation t(9;17)(q34.3;p13.3) in a child with dysmorphic features, **819**
Idiopathic hypoparathyroidism in two patients with 22q11 microdeletion: *letter*, **669**
Kabuki syndrome-like features in monozygotic twin boys with a pseudodicentric chromosome 13, **227**
Kallmann syndrome in a boy with a t(1;10) translocation detected by reverse chromosome painting, **957**

Linkage analysis in blepharophimosis-ptosis syndrome confirms localisation to 3q21-24, **774**
Linkage studies in two families with blepharophimosis-ptosis confirms linkage to 3q21-3q23, **152** *ptr*
Machado Joseph disease maps to the same region of chromosome 14 as the spinocerebellar ataxia type 3 locus, **25**
Mapping a gene for Noonan syndrome to the long arm of chromosome 12, **143** *abs*
Metachromatic leucodystrophy (MLD) in a patient with a constitutional ring chromosome 22, **787**
Molecular analysis of three patients with interstitial deletions of chromosome band 14q31, **564**
Molecular and fluorescence in situ hybridisation (FISH) studies of supernumerary marker 15 chromosomes, **138** *abs*
Monozygotic twins with chromosome 22q11 deletion and discordant phenotype, **746**
Multifocal renal cell carcinoma in sibs from a chromosome 9 linked (TSC1) tuberous sclerosis family, **848**
Neonatal spinal muscular atrophy with diaphragmatic paralysis is unlinked to 5q11.2-q13, **216**
New X linked recessive deafness syndrome with blindness, dystonia, fractures, and mental deficiency is linked to Xq22, **257**
Oguchi disease: suggestion of linkage to markers on chromosome 2q, **396**
Pallister-Killian syndrome: normal karyotype in prenatal chorionic villi, in postnatal lymphocytes, and in slowly growing epidermal cells, but mosaic tetrasomy 12p in skin fibroblasts, **68**
Parents and offspring with the same unbalanced chromosome rearrangements, **138** *abs*
Partial disomy of Xp and the presence of SRY in a phenotypic female, **987**
Partial trisomy 22 (q11.2-q13.1) as a result of duplication and pericentric inversion, **306**
Patient with Wolf-Hirschhorn syndrome originating from translocation t(4;8)(p16.3;q24.3)pat, **65**
Prenatal detection of short arm deletion and isochromosome 18 formation investigated by molecular techniques, **991**
Prenatal and postnatal growth failure associated with maternal heterodisomy for chromosome 7, **871**
Rare variants of chromosome 9 with extra G positive band within the qh region are not alike: *letter*, **405**
Recurrence of DiGeorge syndrome: prenatal detection by FISH of a molecular 22q11 deletion, **657**
Refinement of the localisation of the X linked keratosis follicularis spinulosa decalvans (KFSD) gene in Xp22.13-p22.2, **736**
Saethre-Chotzen syndrome associated with balanced translocations involving 7p21: three further families, **174**
Severe intrauterine growth retardation with increased mitomycin C sensitivity: a further chromosome breakage syndrome, **301**: *letter*, **998**
Shwachman syndrome associated with de novo reciprocal translocation t(6;12)(q16.2;q21.2), **894**
UPD 13: no indication of maternal or paternal imprinting of genes on chromosome 13: *letter*, **493**
WAGR syndrome and multiple exostoses in a patient with del(11)(p11.2p14.2), **823**
X inactivation of the FMR1 fragile X mental retardation gene, **925**
X linked fatal infantile cardiomyopathy maps to Xq28 and is possibly allelic to Barth syndrome, **383**
Y;15 translocation with two different unbalanced segregants, **139** *abs*

Cleft lip (palate) families, Exclusion of retinoic acid receptor and a cartilage matrix protein in non-syndromic CL(P) families: *letter*, **78**

Cleft palate
An autosomal recessive syndrome of cleft palate, cardiac defect, genital anomalies, and ectrodactyly (CCGE), **72**
Anophthalmia with cleft palate and micrognathia: a new syndrome or an unusual presentation of Rubinstein-Taybi syndrome? *letter*, 668

Clinical genetics
General practitioners' expectations of the clinical genetics service in two districts in the West Midlands, **140** *abs*
Training in clinical genetics in the UK: experiences of trainees, **150** *ptr*
What do general practitioners expect from the clinical genetic service? **150** *ptr*

Cluster headache, Cluster headache is an autosomal dominantly inherited disorder in some families: a complex segregation analysis, **954**

CMT1A duplication, Inheritance of CMT1A duplication from a mosaic father, **483**

Cognitive performance, Cognitive performance in UK sample of presymptomatic people carrying the gene for Huntington's disease, **358**

COL1A1 gene, Absence of mutations in the promoter of the COL1A1 gene of type I collagen in patients with osteogenesis imperfecta type I, **697**

Collagen
Absence of mutations in the promoter of the COL1A1 gene of type I collagen in patients with osteogenesis imperfecta type I, **697**
Use of type VII collagen gene (COL7A1) markers in prenatal diagnosis of recessive dystrophic epidermolysis bullosa, **749**

Collagen mutations, Various collagen mutations produce widely varying clinical phenotype, **135** *abs*

Colon cancer, Detection of new mutations in six out of 10 Swiss HNPCC families by genomic sequencing of the hMSH2 and hMLH1 genes, **909**

Colon cancer syndrome, Genetic linkage analysis in hereditary non-polyposis colon cancer syndrome, **352**

Colorectal cancer syndrome, Molecular genetic analysis of hereditary non-polyposis colorectal cancer syndrome, **146** *ptr*

Congenital abnormalities
Congenital anomalies and genetic disorders in families of children with central nervous system tumours, **627**
The profile of major congenital abnormalities in the United Arab Emirates (UAE) population, 7

Congenital adrenal hyperplasia, Parental attitudes to the prenatal diagnosis and treatment of congenital adrenal hyperplasia, **146** *ptr*

Congenital heart disease
Congenital heart disease in spondylothoracic dysostosis: two familial cases, **633**
Right upper limb bud triplication and polythelia, left sided hemihypertrophy and congenital hip dislocation, facial dysmorphism, congenital heart disease, and scoliosis: disorganisation-like spectrum or patterning gene defect?, **555**

Congenital hip dislocation, Right upper limb bud triplication and polythelia, left sided hemihypertrophy and congenital hip dislocation, facial dysmorphism, congenital heart disease, and scoliosis: disorganisation-like spectrum or patterning gene defect?, **555**

Congenital myotonic dystrophy, Influence of the sex of the transmitting grandparent in congenital myotonic dystrophy, **689**

Connexin 32 mutations, Connexin 32 mutations in X linked dominant Charcot-Marie-Tooth disease, **137** *abs*

Consanguinity
Consanguinity among the Saudi Arabian population, **623**
Consanguinity as a determinant of pre-reproductive mortality: a global assessment, **143** *abs*
The profile of major congenital abnormalities in the United Arab Emirates (UAE) population, 7

Cooks syndrome, Anonychia and absence/hypoplasia of distal phalanges (Cooks syndrome): report of a second family, **638**

Cornelia de Lange syndrome, Partial trisomy 3q and the mild Cornelia de Lange syndrome phenotype: *letter*, **837**

Couple antenatal carrier screening, Stepwise or couple antenatal carrier screening for cystic fibrosis?: women's preferences and willingness to pay, **282**

Cowden syndrome, Cowden syndrome: *syndrome of the month*, **117**

COX8 gene, The COX8 gene is not the disease gene of the CMH4 locus in familial hypertrophic cardiomyopathy: *letter*, **670**

Cranial desmoid tumour, Cranial desmoid tumour as the first presentation of familial adenomatous polyposis and the demonstration of the role of the APC gene in the pathogenesis of this tumour, **145** *ptr*

Craniometaphyseal dysplasia, Craniometaphyseal dysplasia (CMD), autosomal dominant form, *syndrome of the month*, **370**

Craniosynostosis, Pfeiffer type cardiocranial syndrome: a third case report, **901**

Cryptic translocation, Identification of an unbalanced cryptic translocation t(9;17)(q34.3;p13.3) in a child with dysmorphic features, **819**

CTGn allele, Instability of a normal (CTG)n allele in the DM kinase gene, **151** *ptr*
Cu/Zn superoxide dismutase gene, Screening for Cu/Zn superoxide dismutase gene mutations in familial and sporadic cases of amyotrophic lateral sclerosis, **152** *ptr*
Cutis verticis gyrata, Cutis verticis gyrata: an unusual 15 week fetus, **147** *ptr*
Cystic fibrosis
Antenatal carrier screening for cystic fibrosis: randomised trial of stepwise *v* couple screening, **140** *abs*
Direct marketing of cystic fibrosis carrier screening: commercial push or population need? *editorial*, **249**: *letter*, **758**
Family study describing second cousins with cystic fibrosis and no common ancestor who is a carrier, **401**
High incidence of ΔI507 mutation of the CFTR gene in a limited area of the north west of France: *letter*, **577**
Identification of cystic fibrosis mutations in Asians and eastern Europeans, **151** *ptr*
Identification of mutations in 1200 cystic fibrosis genes from the north west of England, **151** *ptr*
Identification of mutations of exon 13 of the CFTR gene by SSCP and direct sequencing, **152** *ptr*
Impact of newborn screening on cystic fibrosis testing in Victoria, Australia, **537**
Irish cystic fibrosis database, **972**
Mild cystic fibrosis phenotype in patients with the 3272-26A>G mutation: *letters*, **406**, **919**
Screening for rare CF mutations using a joint SSCP/heteroduplex strategy, **141** *abs*
Stepwise or couple antenatal carrier screening for cystic fibrosis?: women's preferences and willingness to pay, **282**
Two CF patients, one homozygous for the 621 + 1G>T splice mutation, the other homozygous for the 1898 + 1G>A splice mutation: *letter*, **158**
Cytogenetic analysis, Cytogenetic and molecular findings in patients with Turner's syndrome stigmata, **962**

D
D11S97, Association between high serum total IgE levels and D11S97 on chromosome 11q13 in Japanese subjects, **363**
D409H mutation, Unusual expression of Gaucher's disease: cardiovascular calcifications in three sibs homozygous for the D409H mutation, **740**
Deafness, Congenital non-syndromal autosomal recessive deafness in Bengkala, an isolated Balinese village, **336**
Deafness syndrome, A new X linked recessive deafness syndrome with blindness, dystonia, fractures, and mental deficiency is linked to Xq22, **257**
Deletions
Chromosome 13q deletion with Waardenburg syndrome: further evidence for a gene involved in neural crest function on 13q, **531**
Chromosome 1p terminal deletion: report of new findings and confirmation of two characteristic phenotypes, **619**
Del(3)(p25.3) without phenotypic effect, **994**
Detecting deletions in the critical region for lissencephaly on 17p13.3 using fluorescent in situ hybridisation and a PCR assay identifying a dinucleotide repeat polymorphism, **275**
Developmental delay and dysmorphic features associated with a previously undescribed deletion on chromosome 1, **636**
Molecular analysis of three patients with interstitial deletions of chromosome band 14q31, **564**
Prenatal detection of short arm deletion and isochromosome 18 formation investigated by molecular techniques, **991**
WAGR syndrome and multiple exostoses in a patient with del(11)(p11.2p14.2), **823**
Dementia, Hereditary multi-infarct dementia unlinked to chromosome 19q12 in a large Scottish pedigree: evidence of probable locus heterogeneity, **57**
Dental panoramic radiographs, The dental phenotype in familial adenomatous polyposis: diagnostic application of a weighted scoring system for changes on dental panoramic radiographs, **458**
Dentatorubral and pallidoluysian atrophy, Allele distribution of a highly polymorphic repeat on chromosome 12 in patients with symptoms of chorea and ataxia: *letter*, **577**
Desirable characteristics, Public attitudes towards the selection of desirable characteristics in children, **796**
Developmental delay
Cytogenetic findings indicate heterogeneity in patients with blepharophimosis, epicanthus inversus, and developmental delay, **19**
Developmental delay and dysmorphic features associated with a previously undescribed deletion on chromosome 1, **636**
DHP receptor α-1 subunit (CACLN1A3) gene, Mutation in DHP receptor α-1 subunit (CACLN1A3) gene in a Dutch family with hypokalaemic periodic paralysis, **44**
DHPR α1 subunit, Exclusion of defects in the skeletal muscle specific regions of the DHPR α1 subunit as frequent causes of malignant hyperthermia, **913**
DHPR deficiency, A mutation causing DHPR deficiency results in a frameshift and a secondary splicing effect, **220**
Diabetes, Familial pancreatic adenocarcinoma: association with diabetes and early molecular diagnosis, **330**
Diabetes mellitus, Point mutation of the mitochondrial tRNALeu gene (A 3243 G) in maternally inherited hypertrophic cardiomyopathy, diabetes mellitus, renal failure, and sensorineural deafness, **654**
Diagnosis, "Dysmorphic unknowns": does follow up lead to diagnosis? **148** *ptr*
Diaphragmatic paralysis, Neonatal spinal muscular atrophy with diaphragmatic paralysis is unlinked to 5q11.2-q13, **216**
"DIDMOAD" syndrome, "DIDMOAD" syndrome: a degenerative dilemma, **144** *abs*
DiGeorge syndrome
Comparison of facial features of DiGeorge syndrome (DGS) due to deletion 10p13-10pter with DGS due to 22q11 deletion, **149** *ptr*
Recurrence of DiGeorge syndrome: prenatal detection by FISH of a molecular 22q11 deletion, **657**
Unusual (CGG)n expansion and recombination in a family with fragile X and DiGeorge syndrome, **236**
Dihydropteridine reductase deficiency, A mutation causing DHPR deficiency results in a frameshift and a secondary splicing effect, **220**
Dilated cardiomyopathy, Dominantly inherited dilated cardiomyopathy in a Somerset family, **149** *ptr*
Dilated cardiomyopathy, Exclusion of a primary gene defect at the HLA locus in familial idiopathic dilated cardiomyopathy, **876**
Dinucleotide repeat polymorphism, Detecting deletions in the critical region for lissencephaly on 17p13.3 using fluorescent in situ hybridisation and a PCR assay identifying a dinucleotide repeat polymorphism, **275**
Direct marketing, Direct marketing of cystic fibrosis carrier screening: commercial push or population need? *editorial*, **249**: *letter*, **758**
Disomy, Partial disomy of Xp and the presence of SRY in a phenotypic female, **987**
Disseminated atypical mycobacterial infection, Evidence for exclusion of a mutation in NRAMP as the cause of familial disseminated atypical mycobacterial infection in a Maltese kindred, **904**
Distal phalanges, Anonychia and absence/hypoplasia of distal phalanges (Cooks syndrome): report of a second family, **638**
DM gene, Are cataract patients at high risk of being minimal DM gene carriers? **151** *ptr*
DM kinase gene, Instability of a normal (CTG)n allele in the DM kinase gene, **151** *ptr*
DNA analysis
Cytogenetic and molecular findings in patients with Turner's syndrome stigmata, **962**
DNA analysis of Huntington's disease in southern Chinese, **120**
DNA isolation method, Modification of standard proteinase K/phenol method for DNA isolation to improve yield and purity from frozen blood, **129**
DNA methylation based testing, DNA methylation based testing of 450 patients suspected of having Prader-Willi syndrome, **88**
DNA microsatellite analysis, DNA microsatellite analysis of families with autosomal dominant polycystic kidney disease types 1 and 2: evaluation of clinical heterogeneity between both forms of the disease, **442**
DNA testing, Emotional and functional impact of DNA testing on patients with symptoms of Huntington's disease, **516**
Dopamine D2 receptor gene, A weak association between TH and DRD2 genes and bipolar affective disorder in a Spanish sample, **131**
Down's syndrome
Antenatal video counselling for maternal serum screening is an effective method of communication, **150** *ptr*
Attitudes towards Down's syndrome: follow up of a cohort of 280 cases, **597**

Experience of maternal serum screening for Down's syndrome with a high "cut off" risk, **150** *ptr*
Duchenne muscular dystrophy
Deletion patterns of Duchenne and Becker muscular dystrophies in Greece, **48**
Different muscle specific promoter characteristics in two sibs with Duchenne muscular dystrophy: *letter*, **325**
Duchenne muscular dystrophy: negative electroretinograms and normal dark adaptation. Reappraisal of assignment of X linked incomplete congenital stationary night blindness, **348**
Mutation detection and carrier diagnosis in Duchenne muscular dystrophy by pulsed field gel electrophoresis, **142** *abs*
One hundred and ninety four prenatal diagnoses for Duchenne muscular dystrophy, **147** *ptr*
Duplication
A familial Xp+ chromosome, dup(Xq26.3→qter), **891**
Duplication 2 (q11.2-q21): a previously unreported abnormality, **825**
Dwarfism, Renal tubular leakage complicating microcephalic osteodysplastic primordial dwarfism, **234**
DXS255, A variant of Wiskott-Aldrich syndrome with nephropathy is linked to DXS255: *letter*, **757**
DXYS15, Short stature in a girl with partial monosomy of the pseudoautosomal region distal to DXYS15: further evidence for the assignment of the critical region for a pseudoautosomal growth gene(s), **831**
Dysmorphic features
Developmental delay and dysmorphic features associated with a previously undescribed deletion on chromosome 1, **636**
Identification of an unbalanced cryptic translocation t(9; 17)(q34.3;p13.3) in a child with dysmorphic features, **819**
"Dysmorphic unknowns", "Dysmorphic unknowns": does follow up lead to diagnosis? **148** *ptr*
Dystrophic epidermolysis bullosa, Use of type VII collagen gene (COL7A1) markers in prenatal diagnosis of recessive dystrophic epidermolysis bullosa, **749**
Dystrophin gene, Analysis of point mutations in the dystrophin gene, **142** *abs*
Dystrophins, Phylogenetic analysis of vertebrate and invertebrate dystrophins and utrophins, **142** *abs*

E

Ectodermal dysplasia, Twenty-four cases of the EEC syndrome: clinical presentation and management, **716**
Ectrodactyly, An autosomal recessive syndrome of cleft palate, cardiac defect, genital anomalies, and ectrodactyly (CCGE), **72**
Editorial postscript, Editorial postscript: 10 years of change and evolution, **329**
EEC syndrome, Twenty-four cases of the EEC syndrome: clinical presentation and management, **716**
Elastin, Hemizygosity at the elastin locus (7qll) in Williams syndrome: a clinical tool? **145** *abs*
Electroretinogram, Duchenne muscular dystrophy: negative electroretinograms and normal dark adaptation. Reappraisal of assignment of X linked incomplete congenital stationary night blindness, **348**
Emotional impact, Emotional and functional impact of DNA testing on patients with symptoms of Huntington's disease, **516**
Encephalocraniocutaneous lipomatosis, Encephalocraniocutaneous lipomatosis with a mutation in the NF1 gene, **316**
Epicanthus inversus, Cytogenetic findings indicate heterogeneity in patients with blepharophimosis, epicanthus inversus, and developmental delay, **19**
Eugenics, Redrafted Chinese law remains eugenic: *editorial*, **409**
Exon 3, Utilities for high throughput use of the single stand conformational polymorphism method: screening of 791 patients with familial hypercholesterolaemia for mutations in exon 3 of the low density lipoprotein receptor gene, **509**
Exonuclease III, Difference in constitutive heterochromatin behaviour between human amniocytes and lymphocytes detected by a sequential in situ exonuclease III digestion-random primer extension procedure, **32**
Exostoses, WAGR syndrome and multiple exostoses in a patient with del(11)(p11.2p14.2), **823**
Eye disease, A fetus with an X;1 balanced reciprocal translocation and eye disease, **557**

F

Facial dysmorphism, Right upper limb bud triplication and polythelia, left sided hemihypertrophy and congenital hip dislocation, facial dysmorphism, congenital heart disease, and scoliosis: disorganisation-like spectrum or patterning gene defect?, **555**
Facioscapulohumeral muscular dystrophy, Exclusion mapping of chromosomal regions which cross hybridise to FSHD1A associated markers in FSHD1B, **770**
Factor V Leiden variant, Population differences in the frequency of the factor V Leiden variant among people with clinically symptomatic protein C deficiency, **543**
Factor VIII gene, Inversions in the factor VIII gene: improvement of carrier detection and prenatal diagnosis in Dutch haemophilia A families, **296**
Familial adenomatous polyposis
Cranial desmoid tumour as the first presentation of familial adenomatous polyposis and the demonstration of the role of the APC gene in the pathogenesis of this tumour, **145** *ptr*
FAP patients with complete deletions of the APC gene, **146** *ptr*
Genotype-phenotype correlations in familial adenomatous polyposis, **145** *ptr*
Genotype-phenotype correlations of new causative APC gene mutations in patients with familial adenomatous polyposis, **728**
Phenotype-genotype correlation in familial adenomatous polyposis, **146** *ptr*
The dental phenotype in familial adenomatous polyposis: diagnostic application of a weighted scoring system for changes on dental panoramic radiographs, **458**
Familial amyloid polyneuropathy, A new transthyretin variant (Ser 24) associated with familial amyloid polyneuropathy, **279**
Familial amyotrophic lateral sclerosis, Familial amyotrophic lateral sclerosis/motor neurone disease (FALS): a review of current developments, **841**
Familial hypercholesterolaemia
Screening for mutations in exon 4 of the LDL receptor gene: identification of a new deletion mutation, **379**
The impact of mutations in repeat 5 of the ligand binding domain of the LDL receptor on the clinical phenotype of familial hypercholesterolaemia, **137** *abs*
Utilities for high throughput use of the single stand conformational polymorphism method: screening of 791 patients with familial hypercholesterolaemia for mutations in exon 3 of the low density lipoprotein receptor gene, **509**
Fanconi anaemia group C gene, Prototype sequence clues within the Fanconi anaemia group C gene: *letter*, **669**
Ferritin, Bilateral cataract and high serum ferritin: a new dominant genetic disorder?, **778**
Fetal valproate syndrome
Fetal valproate syndrome: follow up of infants diagnosed at birth, **148** *ptr*
Fetal valproate syndrome: *syndrome of the month*, **724**
Fibrillin
Marfan syndrome: fibrillin expression and microfibrillar abnormalities in familial cases, **137** *abs*
Marfan syndrome: fibrillin expression and microfibrillar abnormalities in a family with predominant ocular defects, **1**
Screening of Marfan syndrome patients for mutations in the fibrillin (FBN1) gene, **137** *abs*
Fibrinogen levels, The association of combined α and β fibrinogen genotype on plasma fibrinogen levels in smokers and non-smokers, **585**
Fillippi syndrome, Filippi syndrome: a new case with skeletal abnormalities, **659**
Finland, Phenylketonuria in a low incidence population: molecular characterisation of mutations in Finland, **976**
Fluorescence in situ hybridisation
Detection of hemizygosity at the elastin locus by FISH analysis as a diagnostic test in both classical and atypical cases of Williams syndrome, **692**
FISH analysis on spontaneously arising micronuclei in the ICF syndrome, **502**
Recurrence of DiGeorge syndrome: prenatal detection by FISH of a molecular 22q11 deletion, **657**
FMR1 gene mutation, General overgrowth in the fragile X syndrome: variability in the phenotypic expression of the FRM1 gene mutation, **764**
FMR1 triplet arrays, FMR1 triplet arrays: paying the price for perfection: *review article*, **761**
Fragile X
A rapid, non-radioactive screening test for fragile X mutations at the FRAXA and FRAXE loci, **170**
FRAXE and mental retardation, **162**

Fragile X A and E mutations, Screening for the fragile X A and E mutations by automated fluorescent analysis, **153** *ptr*
Fragile X syndrome
FMR1 triplet arrays: paying the price for perfection: *review article*, **761**
Fragile X syndrome is less common than previously estimated, **144** *abs*
General overgrowth in the fragile X syndrome: variability in the phenotypic expression of the FRM1 gene mutation, **764**
Instability of the CGG repeat at the FRAXA locus and variable phenotypic expression in a large fragile X pedigree, **907**
Molecular DNA testing of a family manifesting fragile X syndrome in both the fraX-A full mutation and mosaic forms, **153** *ptr*
The use of molecular DNA testing to distinguish between mutations at the fragile X-A and -E sites, **154** *ptr*
Unusual (CGG)n expansion and recombination in a family with fragile X and DiGeorge syndrome, **236**
X inactivation of the FMR1 fragile X mental retardation gene, **925**
FRAXA and FRAXE, A rapid, non-radioactive screening test for fragile X mutations at the FRAXA and FRAXE loci, **170**
FRAXA locus, Instability of the CGG repeat at the FRAXA locus and variable phenotypic expression in a large fragile X pedigree, **907**
FRAXE, FRAXE and mental retardation, **162**
Frozen blood, Modification of standard proteinase K/phenol method for DNA isolation to improve yield and purity from frozen blood, **129**
FSHD, Exclusion mapping of chromosomal regions which cross hybridise to FSHD1A associated markers in FSHD1B, **770**

G
G positive band, Rare variants of chromosome 9 with extra G positive band within the qh region are not alike: *letter*, **405**
Gastric carcinoma, An extended Li-Fraumeni kindred with gastric carcinoma and a codon 175 mutation in TP53, **942**
Gaucher's disease, Unusual expression of Gaucher's disease: cardiovascular calcifications in three sibs homozygous for the D409H mutation, **740**
Gene patenting, Gene patenting: a historical review, **141** *abs*
Gene therapy, Public attitudes towards the selection of desirable characteristics in children, **796**
Genealogical guide, Ophthalmic genetics: a genealogical guide to sources in England and Wales, **946**
General practitioners
General practitioners' expectations of the clinical genetics service in two districts in the West Midlands, **140** *abs*
What do general practitioners expect from the clinical genetic service? **150** *ptr*
Generalised resistance to thyroid hormone, Phenotypic variability in patients with generalised resistance to thyroid hormone, **393**
Genetic counselling
Direct molecular analysis of myotonic dystrophy in the German population: important considerations in genetic counselling, **645**
Genetic counselling problems in families with multiple haemostatic disorders, **140** *abs*
The impact of genetic counselling on risk perception in women with a family history of breast cancer, **139** *abs*
Genetic disease, Research in canine and human genetic disease: conference report, **751**
Genetic disorders, Congenital anomalies and genetic disorders in families of children with central nervous system tumours, **627**
Genetic Interest Group
GIG response to the UK Clinical Genetics Society report "The genetic testing of children": *letter*, **490**
Response to GIG's response to the UK Clinical Genetics Society report "The genetic testing of children": *letter*, **838**
The genetic testing of children: *letter*, **492**
Genetic linkage, Phenotypic variability in patients with generalised resistance to thyroid hormone, **393**
Genetic linkage analysis
Genetic linkage analysis in hereditary non-polyposis colon cancer syndrome, **352**
Linkage analysis of a large pedigree with hereditary sideroblastic anaemia, **389**
Genetic risk information, Adolescents' opinions about genetic risk information, prenatal diagnosis, and pregnancy termination, **799**: comment, **805**: *letter*, **836**
Genetic testing
Current issues of personnel and laboratory practices in genetic testing, **780**
Genetic testing for cancer predisposition: need and demand: *annotation*, **161**
GIG response to the UK Clinical Genetics Society report "The genetic testing of children": *letter*, **490**
Response to GIG's response to the UK Clinical Genetics Society report "The genetic testing of children": *letter*, **838**
The genetic testing of children: *letter*, **492**
Genital anomalies, An autosomal recessive syndrome of cleft palate, cardiac defect, genital anomalies, and ectrodactyly (CCGE), **72**
German population, Direct molecular analysis of myotonic dystrophy in the German population: important considerations in genetic counselling, **645**
Germinal mosaics, Recurrence risk for germinal mosaics revisited, **102**
GIG
GIG response to the UK Clinical Genetics Society report "The genetic testing of children": *letters*, **490**, **838**
The genetic testing of children: letter, **492**
Glucocorticoid remediable aldosteronism, Description of two families in the north east of Scotland with glucocorticoid remediable aldosteronism, **137** *abs*
Glycogen storage disease type II, Glycogen storage disease type II: frequency of three common mutant alleles and their associated clinical phenotypes studied in 121 patients: *letter*, **836**
Gonadal mosaicism, Gonadal mosaicism for incontinentia pigmenti in a healthy male, **887**
Gonadotrophin independent precocious puberty, Identification of constitutively activating mutation of the luteinising hormone receptor in a family with male limited gonadotrophin independent precocious puberty (testotoxicosis), **553**
Grandparent transmission, Influence of the sex of the transmitting grandparent in congenital myotonic dystrophy, **689**
Grebe syndrome, Grebe syndrome: a very severely affected case: *letter*, **326**
Greece, Deletion patterns of Duchenne and Becker muscular dystrophies in Greece, **48**
Growth failure, Prenatal and postnatal growth failure associated with maternal heterodisomy for chromosome 7, **871**
Growth gene(s), Chromosomal localisation of a Y specific growth gene(s), **572**
Growth hormone treatment, Good growth response to growth hormone treatment in the ring chromosome 15 syndrome, **486**

H
H714Q mutation, H714Q mutation in Wilson disease is associated with late, neurological presentation, **480**
Haemochromatosis
Allelic associations and homozygosity at loci from HLA-B to D6S299 in genetic haemochromatosis, **446**
International workshop on molecular genetics of haemochromatosis, held at Villa Feltrinelli, Gargnano (Bs), Italy, 25 September 1994: conference report, **320**
Haemophilia, Genetic counselling problems in families with multiple haemostatic disorders, **140** *abs*
Haemophilia A
Extending availability of haemophilia A carrier detection to all families with haemophilia, **152** *ptr*
Inversions in the factor VIII gene: improvement of carrier detection and prenatal diagnosis in Dutch haemophilia A families, **296**
Prenatal diagnosis of haemophilia A by analysis of factor VIII intron 22 inversions, **152** *ptr*
Haemostatic disorders, Genetic counselling problems in families with multiple haemostatic disorders, **140** *abs*
Hamartomas, Hamartomas from patients with tuberous sclerosis show loss of heterozygosity for chromosome 9q34, **152** *ptr*
Haploinsufficiency syndrome, Brachydactyly and mental retardation: a new haploinsufficiency syndrome, **144** *abs*
Haplotype analysis, Haplotype analysis in autosomal dominant polycystic kidney disease, **208**
HD gene, Sequence analysis of the CCG polymorphic region adjacent to the CAG triplet repeat of the HD gene in normal and HD chromosomes, **399**
Headache, Cluster headache is an autosomal dominantly inherited disorder in some families: a complex segregation analysis, **954**

Hemihypertrophy, Right upper limb bud triplication and polythelia, left sided hemihypertrophy and congenital hip dislocation, facial dysmorphism, congenital heart disease, and scoliosis: disorganisation-like spectrum or patterning gene defect?, **555**
Hereditary myopathy, Hereditary myopathy with lactic acidosis, succinate dehydrogenase and aconitase deficiency in northern Sweden: a genealogical study, **344**
Hereditary non-polyposis colon cancer, Detection of new mutations in six out of 10 Swiss HNPCC families by genomic sequencing of the hMSH2 and hMLH1 genes, **909**
Hereditary non-polyposis colorectal cancer syndrome, Molecular genetic analysis of hereditary non-polyposis colorectal cancer syndrome, **146** *ptr*
Heterochromatin behaviour, Difference in constitutive heterochromatin behaviour between human amniocytes and lymphocytes detected by a sequential in situ exonuclease III digestion-random primer extension procedure, **32**
Heterodisomy 7, Prenatal and postnatal growth failure associated with maternal heterodisomy for chromosome 7, **871**
Heterogeneity, Possible genetic heterogeneity in hypochondroplasia: *letter*, **492**
Hirschsprung disease, Mutations of the RET proto-oncogene in the multiple endocrine neoplasia type 2 syndromes and Hirschsprung disease, **135** *abs*
HLA-B27, HLA-B27 and spondyloarthropathy: value for early diagnosis? *review article*, **497**
HLA-B – D6S299 loci, Allelic associations and homozygosity at loci from HLA-B to D6S299 in genetic haemochromatosis, **446**
hMSH2 and hMLH1 genes, Detection of new mutations in six out of 10 Swiss HNPCC families by genomic sequencing of the hMSH2 and hMLH1 genes, **909**
Homeobox genes, Evaluation of candidate genes for familial brachydactyly, **851**
Homeogene, Association study with two markers of a human homeogene in infantile autism, **269**
HSAS, Mutations in L1-CAM in two families with X linked complicated spastic paraplegia, MASA syndrome, and HSAS, **549**
Human Genetic and Chromosome Abnormality Register, The Human Genetic and Chromosome Abnormality Register, **139** *abs*
Humeroradioulnar synostosis, Further report of a patient with humeroradioulnar synostosis and hydronephrosis: *letter*, **78**
Huntingtin gene, Analysis of triplet repeats in the huntingtin gene in Japanese families affected with Huntington's disease, **701**
Huntington's disease
A comparison of the Huntington's disease associated trinucleotide repeat between Chinese and white populations: *letter*, **404**
Analysis of triplet repeats in the huntingtin gene in Japanese families affected with Huntington's disease, **701**
Cognitive performance in UK sample of presymptomatic people carrying the gene for Huntington's disease, **358**
Direct mutation analysis for Huntington's disease: the Oxford experience, **148** *ptr*
DNA analysis of Huntington's disease in southern Chinese, **120**
Emotional and functional impact of DNA testing on patients with symptoms of Huntington's disease, **516**
Epidemiology of Huntington's disease in Northern Ireland, **524**
Huntington's disease in Saudi Arabia: *letter*, **325**
Mutational bias provides a model for the evolution of Huntington's disease and predicts a general increase in disease prevalence, **142** *abs*
Phenotype-genotype correlations in Huntington's disease patients in Northern Ireland and the Republic of Ireland, **147** *ptr*
Prenatal exclusion test for Huntington's disease: experience in the west of Scotland, 1986–1993, **97**
Prenatal exclusion test of a Wolf-Hirschhorn family using PCR amplification with Huntington's disease primers, **149** *ptr*
Sequence analysis of the CCG polymorphic region adjacent to the CAG triplet repeat of the HD gene in normal and HD chromosomes, **399**
Huntington's disease carriers, Neuropsychological characteristics of Huntington's disease carriers: a double blind study, **600**
Hydrocephalus
L1 mutation screening: identification of a non-conservative missense mutation that does not segregate with hydrocephalus in one family, **149** *ptr*
Prenatal diagnosis of X linked hydrocephalus, **144** *abs*
Hydronephrosis, Further report of a patient with humeroradioulnar synostosis and hydronephrosis: *letter*, **78**
Hypertrophic cardiomyopathy
Point mutation of the mitochondrial tRNALeu gene (A 3243 G) in maternally inherited hypertrophic cardiomyopathy, diabetes mellitus, renal failure, and sensorineural deafness, **654**
The COX8 gene is not the disease gene of the CMH4 locus in familial hypertrophic cardiomyopathy: *letter*, **670**
Hypocalciuric hypercalcaemia, Linkage studies in a kindred from Oklahoma with familial benign hypocalciuric hypercalcaemia (FBH) indicate genetic heterogeneity and a third locus for FBH, **152** *ptr*
Hypochondroplasia, Possible genetic heterogeneity in hypochondroplasia: *letter*, **492**
Hypokalaemic periodic paralysis, Mutation in DHP receptor α-1 subunit (CACLN1A3) gene in a Dutch family with hypokalaemic periodic paralysis, **44**
Hypomelanosis of Ito
Functional disomy of a locus (loci) in Xp and hypomelanosis of Ito, **138** *abs*
Monozygotic twins discordant for hypomelanosis of Ito, **148** *ptr*
Hypoparathyroidism, Idiopathic hypoparathyroidism in two patients with 22q11 microdeletion: *letter*, **669**

I

ICF syndrome, FISH analysis on spontaneously arising micronuclei in the ICF syndrome, **502**
Idiopathic dilated cardiomyopathy, Exclusion of a primary gene defect at the HLA locus in familial idiopathic dilated cardiomyopathy, **876**
IgE levels, Association between high serum total IgE levels and D11S97 on chromosome 11q13 in Japanese subjects, **363**
Immune deficiency, Male neonatal death and progressive weakness and immune deficiency in females: an unknown X linked condition, **191**
Immunohistochemistry, Heterogeneity in Li-Fraumeni families: p53 mutation analysis and immunohistochemical staining, **186**
Imprinting, Possible role of imprinting in the Turner phenotype, **138** *abs*
Incontinentia pigmenti, Gonadal mosaicism for incontinentia pigmenti in a healthy male, **887**
Interferon gene cluster, A gene for familial venous malformations maps to chromosome 9p in a second large kindred, **197**
Intrauterine growth retardation, Severe intrauterine growth retardation with increased mitomycin C sensitivity: a further chromosome breakage syndrome, **301**: *letter*, **998**
Irish cystic fibrosis database, The Irish cystic fibrosis database, **972**
Isochromosome 18 formation, Prenatal detection of short arm deletion and isochromosome 18 formation investigated by molecular techniques, **991**

J

Japanese
Analysis of triplet repeats in the huntingtin gene in Japanese families affected with Huntington's disease, **701**
Association between high serum total IgE levels and D11S97 on chromosome 11q13 in Japanese subjects, **363**
Autosomal dominant retinitis pigmentosa locus on chromosome 19q in a Japanese family, **915**
Spinocerebellar ataxia 1 (SCA1) in the Japanese in Hokkaido may derive from a single common ancestry, **590**
Joint contractures, A new autosomal recessive syndrome of characteristic facies, joint contractures, skeletal abnormalities, and normal development: second report with further clinical delineation, **809**
Journal abstracts, **75**, **156**, **324**, **403**, **576**, **666**, **755**, **835**, **917**, **996**
Journal of Medical Genetics, Editorial postscript: 10 years of change and evolution, **329**

K

Kabuki syndrome, Kabuki syndrome-like features in monozygotic twin boys with a pseudodicentric chromosome 13, **227**
Kallmann syndrome, Kallmann syndrome in a boy with a t(1; 10) translocation detected by reverse chromosome painting, **957**

Keratosis follicularis spinulosa decalvans, Refinement of the localisation of the X linked keratosis follicularis spinulosa decalvans (KFSD) gene in Xp22.13-p22.2, **736**
Knee dislocation, Congenital knee dislocation in a 49,XXXXY boy, **309**

L
L1-CAM, Mutations in L1-CAM in two families with X linked complicated spastic paraplegia, MASA syndrome, and HSAS, **549**
Laboratory practices, Current issues of personnel and laboratory practices in genetic testing, **780**
Lactic acidosis, Hereditary myopathy with lactic acidosis, succinate dehydrogenase and aconitase deficiency in northern Sweden: a genealogical study, **344**
Lattice corneal dystrophy type I, Genetic refinement of the chromosome 5q lattice corneal dystrophy type I locus to within a 2 cM interval, **224**
Leber's hereditary optic neuropathy, Leber's hereditary optic neuropathy: the clinical relevance of different mitochondrial DNA mutations: *review article*, **81**
Lethal congenital contracture syndrome, Lethal congenital contracture syndrome (LCCS), a fetal anterior horn cell disease, is not linked to the SMA 5q locus, **36**
Leukaemia, Leukaemia and Sellafield: is there a heritable link? *review article*, **251**: *letter*, **997**
Li-Fraumeni syndrome
An extended Li-Fraumeni kindred with gastric carcinoma and a codon 175 mutation in TP53, **942**
Heterogeneity in Li-Fraumeni families: p53 mutation analysis and immunohistochemical staining, **186**
Limb-girdle muscular dystrophy, Estimate of severe autosomal recessive limb-girdle muscular dystrophy (LGMD2C, LGMD2D) among sporadic muscular dystrophy males: a study of 415 families, **930**
Lindenbaum syndrome, Male neonatal death and progressive weakness and immune deficiency in females: an unknown X linked condition, **191**
Linkage refinement, Linkage refinement localises Sorsby fundus dystrophy between markers D22S275 and D22S278, **240**
Lissencephaly, Detecting deletions in the critical region for lissencephaly on 17p13.3 using fluorescent in situ hybridisation and a PCR assay identifying a dinucleotide repeat polymorphism, **275**
Low density lipoprotein receptor, The impact of mutations in repeat 5 of the ligand binding domain of the LDL receptor on the clinical phenotype of familial hypercholesterolaemia, **137** *abs*
Low density lipoprotein receptor gene
Screening for mutations in exon 4 of the LDL receptor gene: identification of a new deletion mutation, **379**
Utilities for high throughput use of the single stand conformational polymorphism method: screening of 791 patients with familial hypercholesterolaemia for mutations in exon 3 of the low density lipoprotein receptor gene, **509**
Luteinising hormone receptor, Identification of constitutively activating mutation of the luteinising hormone receptor in a family with male limited gonadotrophin independent precocious puberty (testotoxicosis), **553**
Lymphocytes, Difference in constitutive heterochromatin behaviour between human amniocytes and lymphocytes detected by a sequential in situ exonuclease III digestion-random primer extension procedure, **32**
Lymphocytosis, The Aicardi-Goutières syndrome (familial, early onset encephalopathy with calcifications of the basal ganglia and chronic cerebrospinal fluid lymphocytosis): *syndrome of the month*, **881**
Lymphoproliferative disease, Prenatal diagnosis of X linked lymphoproliferative disease using multiplex polymerase chain reaction: *letter*, **756**

M
Machado-Joseph disease
Characterisation of the unstable expanded CAG repeat in the MJD1 gene in four Brazilian families of Portuguese descent with Machado-Joseph disease, **827**
Machado Joseph disease maps to the same region of chromosome 14 as the spinocerebellar ataxia type 3 locus, **25**
McKusick-Kaufmann syndrome, Pallister-Hall syndrome and McKusick-Kaufmann syndrome: one entity? **125**: *letter*, **668**
McKusick type metaphyseal chondrodysplasia, Cartilage-hair hypoplasia: *syndrome of the month*, **39**
Macular dystrophy, Evidence for genetic heterogeneity in Best's vitelliform macular dystrophy, **855**
Male limitation, Identification of constitutively activating mutation of the luteinising hormone receptor in a family with male limited gonadotrophin independent precocious puberty (testotoxicosis), **553**
Male neonatal death, Male neonatal death and progressive weakness and immune deficiency in females: an unknown X linked condition, **191**
Male sexual differentiation, The role of the androgen receptor in male sexual differentiation, **135** *abs*
Malignant hyperthermia
Detection of mutations in the RYR1 gene in malignant hyperthermia susceptible persons, **155** *ptr*
Exclusion of defects in the skeletal muscle specific regions of the DHPR α1 subunit as frequent causes of malignant hyperthermia, **913**
Maltese kindred, Evidence for exclusion of a mutation in NRAMP as the cause of familial disseminated atypical mycobacterial infection in a Maltese kindred, **904**
Marfan syndrome
A null allele phenotype in a severely affected Marfan syndrome patient with reduced levels of fibrillin, **154** *ptr*
Marfan syndrome: fibrillin expression and microfibrillar abnormalities in familial cases, **137** *abs*
Marfan syndrome: fibrillin expression and microfibrillar abnormalities in a family with predominant ocular defects, **1**
Marfan's syndrome: aortic distensibility (measured by MRI) and family phenotype, **149** *ptr*
Screening of Marfan syndrome patients for mutations in the fibrillin (FBN1) gene, **137** *abs*
MASA syndrome, Mutations in L1-CAM in two families with X linked complicated spastic paraplegia, MASA syndrome, and HSAS, **549**
Maternal cell contamination, Detection of maternal cell contamination in amniotic fluid cell cultures using fluorescent labelled microsatellites, **61**
Medical genetics: advances in brief, **75**, **156**, **324**, **403**, **576**, **666**, **755**, **835**, **917**, **996**
Medullary thyroid carcinoma, Molecular analysis of MEN-2A and sporadic MTC tumours in the north east of Scotland, **147** *ptr*
Menkes disease, Menkes disease: *syndrome of the month*, **213**
Mental retardation
Brachydactyly and mental retardation: a new haploinsufficiency syndrome, **144** *abs*
FRAXE and mental retardation, **162**
Metachromatic leucodystrophy, Metachromatic leucodystrophy (MLD) in a patient with a constitutional ring chromosome 22, **787**
Methylation studies, Comparison of microsatellite and methylation studies for the diagnosis of Prader-Willi and Angelman syndrome, **154** *ptr*
Microcephalic osteodysplastic primordial dwarfism, Renal tubular leakage complicating microcephalic osteodysplastic primordial dwarfism, **234**
Microcornea-cataract syndrome, An unusual pedigree with microcornea-cataract syndrome, **813**
Microdeletion, Idiopathic hypoparathyroidism in two patients with 22q11 microdeletion: *letter*, **669**
Microfibrillar abnormalities, Marfan syndrome: fibrillin expression and microfibrillar abnormalities in familial cases, **137** *abs*
Micrognathia, Anophthalmia with cleft palate and micrognathia: a new syndrome or an unusual presentation of Rubinstein-Taybi syndrome? *letter*, **668**
Micronuclei
Chromosome painting of radiation induced micronuclei, **139** *abs*
FISH analysis on spontaneously arising micronuclei in the ICF syndrome, **502**
Microphthalmos, Autosomal dominant simple microphthalmos: incomplete penetrance and variable expression in a large family: *letter*, **326**
Microsatellites
Assignment of microsatellite sequences to the region duplicated in CMT1A (17p12): a useful tool for diagnosis, **231**
Comparison of microsatellite and methylation studies for the diagnosis of Prader-Willi and Angelman syndrome, **154** *ptr*

Detection of maternal cell contamination in amniotic fluid cell cultures using fluorescent labelled microsatellites, **61**
Microsatellite instability in squamous cell carcinoma of the head and neck, **143** *abs*
Use of microsatellite markers in monitoring the progression of bone marrow grafts in patients with severe combined immunodeficiency syndrome, **154** *ptr*
Microtia-anotia, Epidemiology and genetics of microtia-anotia: a registry based study on over one million births, **453**
Miller-Dieker syndrome, Detecting deletions in the critical region for lissencephaly on 17p13.3 using fluorescent in situ hybridisation and a PCR assay identifying a dinucleotide repeat polymorphism, **275**
Mitochondrial disease, Mitochondrial disease, **135** *abs*
Mitochondrial DNA, Mitochondrial DNA does not appear to influence the congenital onset type of myotonic dystrophy, **732**
Mitochondrial DNA mutations, Leber's hereditary optic neuropathy: the clinical relevance of different mitochondrial DNA mutations: *review article*, **81**
Mitochondrial genetics, Nuclear and mitochondrial genetics in Parkinson's disease: *review article*, **411**
Mitochondrial tRNALeu gene (A 3243 G), Point mutation of the mitochondrial tRNALeu gene (A 3243 G) in maternally inherited hypertrophic cardiomyopathy, diabetes mellitus, renal failure, and sensorineural deafness, **654**
Mitomycin C sensitivity, Severe intrauterine growth retardation with increased mitomycin C sensitivity: a further chromosome breakage syndrome, **301**: *letter*, **998**
Mohr-Tranebjærg syndrome, A new X linked recessive deafness syndrome with blindness, dystonia, fractures, and mental deficiency is linked to Xq22, **257**
Molecular diagnosis, Familial pancreatic adenocarcinoma: association with diabetes and early molecular diagnosis, **330**
Motor neurone disease, Familial amyotrophic lateral sclerosis/motor neurone disease (FALS): a review of current developments, **841**
Mouse models
Dissecting human genetic disease through mouse models, **136** *abs*
Mouse model systems and their use in the design of gene therapy, **136** *abs*
MTS1 (p16) tumour suppressor gene, A gene for familial venous malformations maps to chromosome 9p in a second large kindred, **197**
Multi-infarct dementia, Hereditary multi-infarct dementia unlinked to chromosome 19q12 in a large Scottish pedigree: evidence of probable locus heterogeneity, **57**
Multifocal renal cell carcinoma, Multifocal renal cell carcinoma in sibs from a chromosome 9 linked (TSC1) tuberous sclerosis family, **848**
Multiple congenital anomaly syndrome, A new autosomal recessive syndrome of characteristic facies, joint contractures, skeletal abnormalities, and normal development: second report with further clinical delineation, **809**
Multiple endocrine neoplasia, Molecular analysis of MEN-2A and sporadic MTC tumours in the north east of Scotland, **147** *ptr*
Multiple endocrine neoplasia type 2, Mutations of the RET proto-oncogene in the multiple endocrine neoplasia type 2 syndromes and Hirschsprung disease, **135** *abs*
MURCS, MURCS in a male? **314**: *letter*, **919**
Muscular dystrophy, Estimate of severe autosomal recessive limb-girdle muscular dystrophy (LGMD2C, LGMD2D) among sporadic muscular dystrophy males: a study of 415 families, **930**
MutEx assay, Detection of "unknown" mutations using the MutEx assay, **141** *abs*
Mycobacterial infection, Evidence for exclusion of a mutation in NRAMP as the cause of familial disseminated atypical mycobacterial infection in a Maltese kindred, **904**
Myotonic dystrophy
Are cataract patients at high risk of being minimal DM gene carriers? **151** *ptr*
Ascertainment of myotonic dystrophy through cataract by selective screening, **144** *abs*, **519**
Comparison of CTG repeat length expansion and clinical progression of myotonic dystrophy over a five year period, **593**
Contribution of molecular analyses to the estimation of the risk of congenital myotonic dystrophy, **105**
Direct molecular analysis of myotonic dystrophy in the German population: important considerations in genetic counselling, **645**
Evidence for meiotic drive at the myotonic dystrophy locus, **145** *ptr*
Influence of the sex of the transmitting grandparent in congenital myotonic dystrophy, **689**
Instability of a normal (CTG)n allele in the DM kinase gene, **151** *ptr*
Mitochondrial DNA does not appear to influence the congenital onset type of myotonic dystrophy, **732**
Myotonic dystrophy: genetic, clinical, and molecular analysis of patients from 41 Brazilian families, 14
Report on MDA Workshop on Myotonic Dystrophy, 10 October 1994, Montreal, Quebec, Canada, **662**
Myotubular myopathies, The myotubular myopathies: differential diagnosis of the X linked recessive, autosomal dominant, and autosomal recessive forms and present state of DNA studies: *review article*, **673**

N
Nail dysplasia syndrome, Anonychia and absence/hypoplasia of distal phalanges (Cooks syndrome): report of a second family, **638**
Natural resistance associated macrophage protein, Evidence for exclusion of a mutation in NRAMP as the cause of familial disseminated atypical mycobacterial infection in a Maltese kindred, **904**
Nematode worm, The *Caenorhabditis elegans* approach to genome analysis, **136** *abs*
The Netherlands, Mutation in DHP receptor α-1 subunit (CACLN1A3) gene in a Dutch family with hypokalaemic periodic paralysis, **44**
Neural crest function, Chromosome 13q deletion with Waardenburg syndrome: further evidence for a gene involved in neural crest function on 13q, **531**
Neural tube defects
A frameshift mutation in the gene for PAX3 in a girl with spina bifida and mild signs of Waardenburg syndrome, **52**
Absence of linkage between familial neural tube defects and PAX3 gene, **200**
Further evidence for an intermittent pattern of neural tube closure in humans, **205**
Neuroectodermal (CHIME) syndrome, Neuroectodermal (CHIME) syndrome: an additional case with long term follow up of all reported cases, **465**
Neurofibromatosis
Diagnostic issues in a family with late onset type 2 neurofibromatosis, **470**
Encephalocraniocutaneous lipomatosis with a mutation in the NF1 gene, **316**
Familial café au lait spots: a variant of neurofibromatosis type 1, **985**
Psychological aspects of von Recklinghausen neurofibromatosis (NF1): *review article*, **921**
Neurofibromatosis type 1 gene
Characterisation of germline mutations in the neurofibromatosis type 1 (NF1) gene, **706**
Characterisation of a nonsense mutation and a two base insertion in exon 42 of the neurofibromatosis type 1 gene, **153** *ptr*
Neurofibromatosis type 2, Mutation screening and genotype-phenotype correlation in NF2 patients, **138** *abs*
Neuropsychological characteristics, Neuropsychological characteristics of Huntington's disease carriers: a double blind study, **600**
New syndrome, A new autosomal recessive syndrome of characteristic facies, joint contractures, skeletal abnormalities, and normal development: second report with further clinical delineation, **809**
Newborn screening, The impact of newborn screening on cystic fibrosis testing in Victoria, Australia, **537**
NF1 gene, Encephalocraniocutaneous lipomatosis with a mutation in the NF1 gene, **316**
Night blindness, Duchenne muscular dystrophy: negative electroretinograms and normal dark adaptation. Reappraisal of assignment of X linked incomplete congenital stationary night blindness, **348**
Nijmegen breakage syndrome, The Nijmegen breakage syndrome is not an allelic form of ataxia telangiectasia, **149** *ptr*
Non-disjunction, Double non-disjunction in maternal meiosis II giving rise to a fetus with 48,XXX,+21, **650**

Non-polyposis colon cancer, Detection of new mutations in six out of 10 Swiss HNPCC families by genomic sequencing of the hMSH2 and hMLH1 genes, **909**
Non-polyposis colon cancer syndrome, Genetic linkage analysis in hereditary non-polyposis colon cancer syndrome, **352**
Non-smokers, The association of combined α and β fibrinogen genotype on plasma fibrinogen levels in smokers and non-smokers, **585**
Noonan syndrome
Increased infections associated with immunological abnormalities in Noonan syndrome, **147** *ptr*
Mapping a gene for Noonan syndrome to the long arm of chromosome 12, **143** *abs*
Vaginal rhabdomyosarcoma in a patient with Noonan syndrome, **743**
Northern Ireland, The epidemiology of Huntington's disease in Northern Ireland, **524**
Notices, **160**, **328**, **672**, **760**, **920**
NRAMP, Evidence for exclusion of a mutation in NRAMP as the cause of familial disseminated atypical mycobacterial infection in a Maltese kindred, **904**
Nuclear genetics, Nuclear and mitochondrial genetics in Parkinson's disease: *review article*, **411**
Null allele, Genomic rearrangements in childhood spinal muscular atrophy: linkage disequilibrium with a null allele, **93**

O
Ocular defects, Marfan syndrome: fibrillin expression and microfibrillar abnormalities in a family with predominant ocular defects, 1
Oculocutaneous albinism, Oculocutaneous albinism among schoolchildren in Harare, Zimbabwe, **859**
Oesophageal cancer, Mapping of the tylosis cancer gene in a Liverpool pedigree with palmoplantar keratoderma and oesophageal cancer, 143 *abs*
Oguchi disease, Oguchi disease: suggestion of linkage to markers on chromosome 2q, **396**
Ophthalmic genetics, Ophthalmic genetics: a genealogical guide to sources in England and Wales, **946**
Optic atrophy, No evidence of genetic heterogeneity in dominant optic atrophy, **951**
Ornithine transcarbamylase deficiency, The molecular basis of ornithine transcarbamylase deficiency: modelling the human enzyme and the effects of mutations, **680**
Osteogenesis imperfecta, Perinatal lethal osteogenesis imperfecta: *syndrome of the month*, **284**
Osteogenesis imperfecta type I, Absence of mutations in the promoter of the COL1A1 gene of type I collagen in patients with osteogenesis imperfecta type I, **697**
Otofaciocervical syndrome, Otofaciocervical syndrome: a sporadic patient supports splitting from the branchio-oto-renal syndrome, **816**
Ovarian cancer
Experience of familial ovarian cancer in Aberdeen, **145** *ptr*
Factors influencing decisions on whether to proceed with predictive testing for breast/ovarian cancers, **140** *abs*
Use of linked markers in breast/ovarian cancer families, **145** *ptr*

P
p53 mutation analysis, Heterogeneity in Li-Fraumeni families: p53 mutation analysis and immunohistochemical staining, **186**
Pallister-Hall syndrome
Pallister-Hall syndrome and McKusick-Kaufmann syndrome: one entity? **125**: *letter*, **668**
Stringent delineation of Pallister-Hall syndrome in two long surviving patients: importance of radiological anomalies of the hands, **605**
Pallister-Killian syndrome, Pallister-Killian syndrome: normal karyotype in prenatal chorionic villi, in postnatal lymphocytes, and in slowly growing epidermal cells, but mosaic tetrasomy 12p in skin fibroblasts, **68**
Palmoplantar keratoderma, Mapping of the tylosis cancer gene in a Liverpool pedigree with palmoplantar keratoderma and oesophageal cancer, **143** *abs*
Pancreatic adenocarcinoma, Familial pancreatic adenocarcinoma: association with diabetes and early molecular diagnosis, **330**
Parkinson's disease, Nuclear and mitochondrial genetics in Parkinson's disease: *review article*, **411**
Partial disomy of Xp, Partial disomy of Xp and the presence of SRY in a phenotypic female, **987**
Partial monosomy, Short stature in a girl with partial monosomy of the pseudoautosomal region distal to DXYS15: further evidence for the assignment of the critical region for a pseudoautosomal growth gene(s), **831**
Partial proximal trisomy 10q syndrome, Further delineation of the partial proximal trisomy 10q syndrome, **968**
Partial trisomy 22, Partial trisomy 22 (q11.2-q13.1) as a result of duplication and pericentric inversion, **306**
Partial trisomy 3q, Partial trisomy 3q and the mild Cornelia de Lange syndrome phenotype: *letter*, **837**
Partial trisomy 8p, Familial partial trisomy 8p without dysmorphic features and only mild mental retardation, **792**
PAX3 gene
A frameshift mutation in the gene for PAX3 in a girl with spina bifida and mild signs of Waardenburg syndrome, **52**
Absence of linkage between familial neural tube defects and PAX3 gene, **200**
PAX6 mutation, A new PAX6 mutation in familial aniridia, **488**
Pax 3 loci, Exclusion of RET and Pax 3 loci in Waardenburg-Hirschsprung disease, **312**
Perinatal lethal osteogenesis imperfecta, Perinatal lethal osteogenesis imperfecta: *syndrome of the month*, **284**
Peroxisomal matrix protein, Characterisation of a gene encoding a novel peroxisomal matrix protein, PXEL, **141** *abs*
Pfeiffer type cardiocranial syndrome, Pfeiffer type cardiocranial syndrome: a third case report, **901**
Phaeochromocytoma
Molecular genetic diagnosis of von Hippel-Lindau disease in familial phaeochromocytoma, **885**
Mutations in the RET proto-oncogene and the von Hippel-Lindau disease tumour suppressor gene in sporadic and syndromic phaeochromocytomas, **934**
Phenylketonuria
Comparison of genotype and phenotype in Northern Ireland PKU patients homozygous for the mutations R408W, I65T, and R408Q, **147** *ptr*
Discordant phenylketonuria phenotypes in one family: the relationship between genotype and clinical outcome is a function of multiple effects, **867**
Phenylketonuria in a low incidence population: molecular characterisation of mutations in Finland, **976**
The population genetics of phenylketonuria in Northern Ireland, **143** *abs*
Polycystic kidney disease
A family with autosomal dominant polycystic kidney disease linked to 4q21-23: *letter*, **493**
An evaluation of sonographic diagnostic criteria for autosomal dominant polycystic kidney disease 1, **150** *ptr*
DNA microsatellite analysis of families with autosomal dominant polycystic kidney disease types 1 and 2: evaluation of clinical heterogeneity between both forms of the disease, **442**
Haplotype analysis in autosomal dominant polycystic kidney disease, **208**
Polydactyly, Absence/hypoplasia of tibia, polydactyly, retrocerebellar arachnoid cyst, and other anomalies: an autosomal recessive disorder, **896**
Polymerase chain reaction
Cholinesterase variants: rapid characterisation by PCR/SSCP and evidence for molecular homogeneity, **109**
Detection of germline mutations in the von Hippel-Lindau disease gene by the primer specified restriction map modification method, **938**
Prenatal diagnosis of X linked lymphoproliferative disease using multiplex polymerase chain reaction: *letter*, **756**
Prenatal exclusion test of a Wolf-Hirschhorn family using PCR amplification with Huntington's disease primers, **149** *ptr*
Rapid detection of rare variants and common polymorphisms in the APC gene by PCR-SSCP for presymptomatic diagnosis and showing allele loss, **568**
Polythelia, Right upper limb bud triplication and polythelia, left sided hemihypertrophy and congenital hip dislocation, facial dysmorphism, congenital heart disease, and scoliosis: disorganisation-like spectrum or patterning gene defect?, **555**
Porphobilinogen deaminase gene
Four mutations in the porphobilinogen deaminase gene in patients with acute intermittent porphyria, **979**

Identification of three mutations in the porphobilinogen deaminase gene in four South African patients with acute intermittent porphyria, **141** *abs*

Porphyria
Four mutations in the porphobilinogen deaminase gene in patients with acute intermittent porphyria, **979**
Identification of three mutations in the porphobilinogen deaminase gene in four South African patients with acute intermittent porphyria, **141** *abs*

Prader-Willi syndrome
A clinical, cytogenetic, and molecular study of 40 adults with the Prader-Willi syndrome, **181**
Comparison of microsatellite and methylation studies for the diagnosis of Prader-Willi and Angelman syndrome, **154** *ptr*
DNA methylation based testing of 450 patients suspected of having Prader-Willi syndrome, **88**
Molecular and fluorescence in situ hybridisation (FISH) studies of supernumerary marker 15 chromosomes, **138** *abs*

Precocious puberty, Identification of constitutively activating mutation of the luteinising hormone receptor in a family with male limited gonadotrophin independent precocious puberty (testotoxicosis), **553**

Predictive testing
Attitudes to predictive testing for BRCA1, **140** *abs*
Factors influencing decisions on whether to proceed with predictive testing for breast/ovarian cancers, **140** *abs*

Pregnancy termination, Adolescents' opinions about genetic risk information, prenatal diagnosis, and pregnancy termination, **799**: comment, **805**: *letter*, **836**

Prenatal detection, Prenatal detection of short arm deletion and isochromosome 18 formation investigated by molecular techniques, **991**

Prenatal diagnosis
Adolescents' opinions about genetic risk information, prenatal diagnosis, and pregnancy termination, **799**: comment, **805**: *letter*, **836**
One hundred and ninety four prenatal diagnoses for Duchenne muscular dystrophy, **147** *ptr*
Prenatal diagnosis of haemophilia A by analysis of factor VIII intron 22 inversions, **152** *ptr*
Prenatal diagnosis of X linked hydrocephalus, **144** *abs*

Prenatal exclusion test
Prenatal exclusion test for Huntington's disease: experience in the west of Scotland, 1986–1993, **97**
Prenatal exclusion test of a Wolf-Hirschhorn family using PCR amplification with Huntington's disease primers, **149** *ptr*

Presenile Alzheimer's disease, Apolipoprotein E ε4 allele is a risk factor for familial and sporadic presenile Alzheimer's disease in both homozygote and heterozygote carriers, **642**

Progressive weakness, Male neonatal death and progressive weakness and immune deficiency in females: an unknown X linked condition, **191**

Protein C deficiency, Population differences in the frequency of the factor V Leiden variant among people with clinically symptomatic protein C deficiency, **543**

Proteinase K/phenol method, Modification of standard proteinase K/phenol method for DNA isolation to improve yield and purity from frozen blood, **129**

Proximal myotonic myopathy, PROMM: proximal myotonic myopathy, a new myotonic disorder, **148** *ptr*

Pseudoautosomal growth gene(s), Short stature in a girl with partial monosomy of the pseudoautosomal region distal to DXYS15: further evidence for the assignment of the critical region for a pseudoautosomal growth gene(s), **831**

Pseudodicentric chromosome 13, Kabuki syndrome-like features in monozygotic twin boys with a pseudodicentric chromosome 13, **227**

Psoriasis
A major susceptibility gene for psoriasis maps to 17q in British families and evidence for genetic heterogeneity, **142** *abs*
Confirmation of genetic heterogeneity in familial psoriasis, **546**

Psychology, Psychological aspects of von Recklinghausen neurofibromatosis (NF1): *review article*, **921**

Public attitudes, Public attitudes towards the selection of desirable characteristics in children, **796**

Pulsed field gel electrophoresis, Mutation detection and carrier diagnosis in Duchenne muscular dystrophy by pulsed field gel electrophoresis, **142** *abs*

PXEL, Characterisation of a gene encoding a novel peroxisomal matrix protein, PXEL, **141** *abs*

Q

Quality assurance and control, Current issues of personnel and laboratory practices in genetic testing, **780**

R

Radiation induced micronuclei, Chromosome painting of radiation induced micronuclei, **139** *abs*

RB1 gene, Detection of germline mutations in the RB1 gene using amplification mismatch detection analysis and direct sequencing of PCR products, **154** *ptr*

RB1 germline mutations, Identification of RB1 germline mutations in Argentinian families with sporadic bilateral retinoblastoma, **475**

Recessive dystrophic epidermolysis bullosa, Use of type VII collagen gene (COL7A1) markers in prenatal diagnosis of recessive dystrophic epidermolysis bullosa, **749**

Recurrence risk, Recurrence risk for germinal mosaics revisited, **102**

Renal cell carcinoma, Multifocal renal cell carcinoma in sibs from a chromosome 9 linked (TSC1) tuberous sclerosis family, **848**

Renal failure, Point mutation of the mitochondrial tRNALeu gene (A 3243 G) in maternally inherited hypertrophic cardiomyopathy, diabetes mellitus, renal failure, and sensorineural deafness, **654**

Renal involvement, Renal involvement in tuberous sclerosis, **144** *abs*

Renal tubular leakage, Renal tubular leakage complicating microcephalic osteodysplastic primordial dwarfism, **234**

Research, Research in canine and human genetic disease: conference report, **751**

Restriction endonuclease based tests, Detection of germline mutations in the von Hippel-Lindau disease gene by the primer specified restriction map modification method, **938**

RET gene, Exclusion of RET and Pax 3 loci in Waardenburg-Hirschsprung disease, **312**

RET proto-oncogene
Mutations of the RET proto-oncogene in the multiple endocrine neoplasia type 2 syndromes and Hirschsprung disease, **135** *abs*
Mutations in the RET proto-oncogene and the von Hippel-Lindau disease tumour suppressor gene in sporadic and syndromic phaeochromocytomas, **934**

Retinitis pigmentosa
Analysis of rhodopsin splice site mutations in retinitis pigmentosa, **153** *ptr*
Autosomal dominant retinitis pigmentosa locus on chromosome 19q in a Japanese family, **915**

Retinoblastoma
Detection of germline mutations in the RB1 gene using amplification mismatch detection analysis and direct sequencing of PCR products, **154** *ptr*
Identification of RB1 germline mutations in Argentinian families with sporadic bilateral retinoblastoma, **475**
Molecular pathology of the RB1 gene in retinoblastoma, breast and bladder tumours, **155** *ptr*

Retinoic acid receptor, Exclusion of retinoic acid receptor and a cartilage matrix protein in non-syndromic CL(P) families: *letter*, **78**

Retrocerebellar arachnoid cyst, Absence/hypoplasia of tibia, polydactyly, retrocerebellar arachnoid cyst, and other anomalies: an autosomal recessive disorder, **896**

Reverse chromosome painting, Kallmann syndrome in a boy with a t(1;10) translocation detected by reverse chromosome painting, **957**

Rhabdomyosarcoma, Vaginal rhabdomyosarcoma in a patient with Noonan syndrome, **743**

Rhodopsin, Analysis of rhodopsin splice site mutations in retinitis pigmentosa, **153** *ptr*

Right upper limb bud triplication, Right upper limb bud triplication and polythelia, left sided hemihypertrophy and congenital hip dislocation, facial dysmorphism, congenital heart disease, and scoliosis: disorganisation-like spectrum or patterning gene defect?, **555**

Ring chromosome
Good growth response to growth hormone treatment in the ring chromosome 15 syndrome, **486**
Molecular cytogenetic characterisation of a small ring X chromosome in a Turner patient and in a male patient with congenital abnormalities: role of X inactivation, **113**

X inactivation studies in patients with Turner's syndrome and ring X chromosomes, **153** *ptr*

Risk factors
Cancer families: what risk are they given and do the risks affect management? **139** *abs*
Identification of women at high genetic risk of breast cancer through the National Health Service Breast Screening Programme (NHSBSP), **862**
The impact of genetic counselling on risk perception in women with a family history of breast cancer, **139** *abs*

Robertsonian 15/15 translocation, A case of Angelman syndrome arising as a result of a de novo Robertsonian 15/15 translocation, **154** *ptr*

Rubinstein-Taybi syndrome, Anophthalmia with cleft palate and micrognathia: a new syndrome or an unusual presentation of Rubinstein-Taybi syndrome? *letter*, **668**

S

Saethre-Chotzen syndrome, Saethre-Chotzen syndrome associated with balanced translocations involving 7p21: three further families, **174**

Saudi Arabia
Consanguinity among the Saudi Arabian population, **623**
Huntington's disease in Saudi Arabia: *letter*, **325**

Schizencephaly, Familial schizencephaly: further delineation of a rare disorder, **242**

Scoliosis, Right upper limb bud triplication and polythelia, left sided hemihypertrophy and congenital hip dislocation, facial dysmorphism, congenital heart disease, and scoliosis: disorganisation-like spectrum or patterning gene defect?, **555**

Scotland, Hereditary multi-infarct dementia unlinked to chromosome 19q12 in a large Scottish pedigree: evidence of probable locus heterogeneity, **57**

Screening
Ascertainment of myotonic dystrophy through cataract by selective screening, **144** *abs*, **519**
Identification of women at high genetic risk of breast cancer through the National Health Service Breast Screening Programme (NHSBSP), **862**
The impact of newborn screening on cystic fibrosis testing in Victoria, Australia, **537**

Segmentation, Molecular analysis of segmentation in vertebrate development, **136** *abs*

Segregation analysis, Cluster headache is an autosomal dominantly inherited disorder in some families: a complex segregation analysis, **954**

Sellafield, Leukaemia and Sellafield: is there a heritable link? *review article*, **251**: *letter*, **997**

Sensorineural deafness, Point mutation of the mitochondrial tRNALeu gene (A 3243 G) in maternally inherited hypertrophic cardiomyopathy, diabetes mellitus, renal failure, and sensorineural deafness, **654**

Severe combined immunodeficiency syndrome, The use of microsatellite markers in monitoring the progression of bone marrow grafts in patients with severe combined immunodeficiency syndrome, **154** *ptr*

Sex chromosomal gene expression, On the mechanisms of sex chromosomal gene expression with particular reference to X inactivation, **142** *abs*

Sex reversal, Partial disomy of Xp and the presence of SRY in a phenotypic female, **987**

Shwachman syndrome, Shwachman syndrome associated with de novo reciprocal translocation t(6;12)(q16.2;q21.2), **894**

Sideroblastic anaemia, Linkage analysis of a large pedigree with hereditary sideroblastic anaemia, **389**

Siemens-1 syndrome, Refinement of the localisation of the X linked keratosis follicularis spinulosa decalvans (KFSD) gene in Xp22.13-p22.2, **736**

Signal transduction mechanisms, Cell cycle regulation and signal transduction mechanisms in yeast: the relevance to human disease, **136** *abs*

Single strand conformational polymorphism
Cholinesterase variants: rapid characterisation by PCR/SSCP and evidence for molecular homogeneity, **109**
Rapid detection of rare variants and common polymorphisms in the APC gene by PCR-SSCP for presymptomatic diagnosis and showing allele loss, **568**
Screening for rare CF mutations using a joint SSCP/heteroduplex strategy, **141** *abs*
Utilities for high throughput use of the single strand conformational polymorphism method: screening of 791 patients with familial hypercholesterolaemia for mutations in exon 3 of the low density lipoprotein receptor gene, **509**

Skeletal abnormalities, A new autosomal recessive syndrome of characteristic facies, joint contractures, skeletal abnormalities, and normal development: second report with further clinical delineation, **809**

Skeletal muscle, Exclusion of defects in the skeletal muscle specific regions of the DHPR α1 subunit as frequent causes of malignant hyperthermia, **913**

Smokers, The association of combined α and β fibrinogen genotype on plasma fibrinogen levels in smokers and non-smokers, **585**

Solid tissue, ACC Solid Tissue Working Party: a progress report, **139** *abs*

Sorsby fundus dystrophy, Linkage refinement localises Sorsby fundus dystrophy between markers D22S275 and D22S278, **240**

Spastic paraplegia, Mutations in L1-CAM in two families with X linked complicated spastic paraplegia, MASA syndrome, and HSAS, **549**

Spina bifida, A frameshift mutation in the gene for PAX3 in a girl with spina bifida and mild signs of Waardenburg syndrome, **52**

Spinal muscular atrophy
Genomic rearrangements in childhood spinal muscular atrophy: linkage disequilibrium with a null allele, **93**
Lethal congenital contracture syndrome (LCCS), a fetal anterior horn cell disease, is not linked to the SMA 5q locus, **36**
Neonatal spinal muscular atrophy with diaphragmatic paralysis is unlinked to 5q11.2-q13, **216**

Spinocerebellar ataxia, Machado Joseph disease maps to the same region of chromosome 14 as the spinocerebellar ataxia type 3 locus, **25**

Spinocerebellar ataxia 1, Spinocerebellar ataxia 1 (SCA1) in the Japanese in Hokkaido may derive from a single common ancestry, **590**

Split hand/foot malformation, Bilateral split hand/foot malformation and inv(7)(p22q21.3), **375**

Spondyloarthropathy, HLA-B27 and spondyloarthropathy: value for early diagnosis? *review article*, **497**

Spondylothoracic dysostosis, Congenital heart disease in spondylothoracic dysostosis: two familial cases, **633**

Squamous cell carcinoma of the head and neck, Microsatellite instability in squamous cell carcinoma of the head and neck, **143** *abs*

SRY genes, Partial disomy of Xp and the presence of SRY in a phenotypic female, **987**

Stepwise screening, Stepwise or couple antenatal carrier screening for cystic fibrosis?: women's preferences and willingness to pay, **282**

Succinate dehydrogenase, Hereditary myopathy with lactic acidosis, succinate dehydrogenase and aconitase deficiency in northern Sweden: a genealogical study, **344**

Superoxide dismutase, Superoxide dismutase mutations in an unselected cohort of Scottish amyotrophic lateral sclerosis patients, **290**

Sweden, Hereditary myopathy with lactic acidosis, succinate dehydrogenase and aconitase deficiency in northern Sweden: a genealogical study, **344**

Syndactyly type II, A large Turkish kindred with syndactyly type II (synpolydactyly). 1 Field investigation, clinical and pedigree data, **421**: 2 Homozygous phenotype, **435**

T

Testotoxicosis, Identification of constitutively activating mutation of the luteinising hormone receptor in a family with male limited gonadotrophin independent precocious puberty (testotoxicosis), **553**

Tetrasomy, Pallister-Killian syndrome: normal karyotype in prenatal chorionic villi, in postnatal lymphocytes, and in slowly growing epidermal cells, but mosaic tetrasomy 12p in skin fibroblasts, **68**

Thalassaemia, Thalassaemia in Azerbaijan: *letter*, **245**

Thanatophoric dysplasia, De novo 1;10 balanced translocation in an infant with thanatophoric dysplasia: a clue to the locus of the candidate gene, **293**

Thyroid hormone, Phenotypic variability in patients with generalised resistance to thyroid hormone, **393**

Tibia, Absence/hypoplasia of tibia, polydactyly, retrocerebellar arachnoid cyst, and other anomalies: an autosomal recessive disorder, **896**

TP53, An extended Li-Fraumeni kindred with gastric carcinoma and a codon 175 mutation in TP53, **942**
Training, Training in clinical genetics in the UK: experiences of trainees, **150** *ptr*
Translocation
De novo 1;10 balanced translocation in an infant with thanatophoric dysplasia: a clue to the locus of the candidate gene, **293**
Fetus with an X;1 balanced reciprocal translocation and eye disease, **557**
Identification of an unbalanced cryptic translocation t(9;17)(q34.3;p13.3) in a child with dysmorphic features, **819**
Kallmann syndrome in a boy with a t(1;10) translocation detected by reverse chromosome painting, **957**
Patient with Wolf-Hirschhorn syndrome originating from translocation t(4;8)(p16.3;q24.3)pat, **65**
Saethre-Chotzen syndrome associated with balanced translocations involving 7p21: three further families, **174**
Shwachman syndrome associated with de novo reciprocal translocation t(6;12)(q16.2;q21.2), **894**
Y;15 translocation with two different unbalanced segregants, **139** *abs*
Transthyretin variant, A new transthyretin variant (Ser 24) associated with familial amyloid polyneuropathy, **279**
Treacher Collins syndrome, Treacher Collins syndrome: *syndrome of the month*, **806**
Trinucleotide repeat, A comparison of the Huntington's disease associated trinucleotide repeat between Chinese and white populations: *letter*, **404**
Triplication, Right upper limb bud triplication and polythelia, left sided hemihypertrophy and congenital hip dislocation, facial dysmorphism, congenital heart disease, and scoliosis: disorganisation-like spectrum or patterning gene defect?, **555**
Trisomy
A prenatal diagnosis involving trisomy 16 mosaicism, **146** *ptr*
Double non-disjunction in maternal meiosis II giving rise to a fetus with 48,XXX,+21, **650**
Further delineation of the partial proximal trisomy 10q syndrome, **968**
Tuberous sclerosis
Hamartomas from patients with tuberous sclerosis show loss of heterozygosity for chromosome 9q34, **152** *ptr*
Multifocal renal cell carcinoma in sibs from a chromosome 9 linked (TSC1) tuberous sclerosis family, **848**
Renal involvement in tuberous sclerosis, **144** *abs*
Turkey, A large Turkish kindred with syndactyly type II (synpolydactyly). 1 Field investigation, clinical and pedigree data, **421**: 2 Homozygous phenotype, **435**
Turner's syndrome
Cytogenetic and molecular findings in patients with Turner's syndrome stigmata, **962**
Detection of Y mosaicism in patients with Turner's syndrome: *letter*, **578**
Molecular cytogenetic characterisation of a small ring X chromosome in a Turner patient and in a male patient with congenital abnormalities: role of X inactivation, **113**
Possible role of imprinting in the Turner phenotype, **138** *abs*
X inactivation studies in patients with Turner's syndrome and ring X chromosomes, **153** *ptr*
Twins
Kabuki syndrome-like features in monozygotic twin boys with a pseudodicentric chromosome 13, **227**
Monozygotic twins with chromosome 22q11 deletion and discordant phenotype, **746**
Tylosis cancer gene, Mapping of the tylosis cancer gene in a Liverpool pedigree with palmoplantar keratoderma and oesophageal cancer, **143** *abs*
Tyrosine hydroxylase, A weak association between TH and DRD2 genes and bipolar affective disorder in a Spanish sample, **131**

U
United Arab Emirates, The profile of major congenital abnormalities in the United Arab Emirates (UAE) population, **7**
UPD 13, UPD 13: no indication of maternal or paternal imprinting of genes on chromosome 13: *letter*, **493**
Utrophins, Phylogenetic analysis of vertebrate and invertebrate dystrophins and utrophins, **142** *abs*

V
Vaginal rhabdomyosarcoma, Vaginal rhabdomyosarcoma in a patient with Noonan syndrome, **743**
Valproate syndrome, Fetal valproate syndrome: *syndrome of the month*, **724**
Velocardiofacial syndrome
Cerebellar atrophy in a patient with velocardiofacial syndrome, **561**
Velocardiofacial syndrome: learning difficulties and intervention, **612**
Venous malformations, A gene for familial venous malformations maps to chromosome 9p in a second large kindred, **197**
Vertebrate development
Molecular analysis of segmentation in vertebrate development, **136** *abs*
Vertebrate developmental genetics: from one genome many species, **135** *abs*
von Hippel-Lindau disease
Detection of germline mutations in the von Hippel-Lindau disease gene by the primer specified restriction map modification method, **938**
Genotype-phenotype correlations in von Hippel-Lindau disease, **137** *abs*
Molecular genetic diagnosis of von Hippel-Lindau disease in familial phaeochromocytoma, **885**
Mutations in the RET proto-oncogene and the von Hippel-Lindau disease tumour suppressor gene in sporadic and syndromic phaeochromocytomas, **934**
von Recklinghausen neurofibromatosis, Psychological aspects of von Recklinghausen neurofibromatosis (NF1): *review article*, **921**
von Willebrand's disease, Genetic counselling problems in families with multiple haemostatic disorders, **140** *abs*

W
Waardenburg-Hirschsprung disease, Exclusion of RET and Pax 3 loci in Waardenburg-Hirschsprung disease, **312**
Waardenburg syndrome
A frameshift mutation in the gene for PAX3 in a girl with spina bifida and mild signs of Waardenburg syndrome, **52**
Chromosome 13q deletion with Waardenburg syndrome: further evidence for a gene involved in neural crest function on 13q, **531**
WAGR syndrome, WAGR syndrome and multiple exostoses in a patient with del(11)(p11.2p14.2), **823**
Williams syndrome
Detection of hemizygosity at the elastin locus by FISH analysis as a diagnostic test in both classical and atypical cases of Williams syndrome, **692**
Hemizygosity at the elastin locus (7qll) in Williams syndrome: a clinical tool? **145** *abs*
Wilms' tumour, WAGR syndrome and multiple exostoses in a patient with del(11)(p11.2p14.2), **823**
Wilson disease, H714Q mutation in Wilson disease is associated with late, neurological presentation, **480**
Wiskott-Aldrich syndrome, A variant of Wiskott-Aldrich syndrome with nephropathy is linked to DXS255: *letter*, **757**
Wolf-Hirschhorn family, Prenatal exclusion test of a Wolf-Hirschhorn family using PCR amplification with Huntington's disease primers, **149** *ptr*
Wolf-Hirschhorn syndrome, A patient with Wolf-Hirschhorn syndrome originating from translocation t(4;8)(p16.3;q24.3)pat, **65**

X
X inactivation
Comparison of methods for studying X inactivation status in females, **151** *ptr*
Molecular cytogenetic characterisation of a small ring X chromosome in a Turner patient and in a male patient with congenital abnormalities: role of X inactivation, **113**
On the mechanisms of sex chromosomal gene expression with particular reference to X inactivation, **142** *abs*
X inactivation studies in patients with Turner's syndrome and ring X chromosomes, **153** *ptr*
X linked agammaglobulinaemia, A new point mutation involving a highly conserved leucine in the Btk SH2 domain in a family with X linked agammaglobulinaemia: *letter*, **77**
X linked complicated spastic paraplegia, Mutations in L1-CAM in two families with X linked complicated spastic paraplegia, MASA syndrome, and HSAS, **549**

X linked condition, Male neonatal death and progressive weakness and immune deficiency in females: an unknown X linked condition, **191**
X linked hydrocephalus, Prenatal diagnosis of X linked hydrocephalus, **144** *abs*
X linked lymphoproliferative disease, Prenatal diagnosis of X linked lymphoproliferative disease using multiplex polymerase chain reaction: *letter*, **756**
X linked recessive deafness syndrome, A new X linked recessive deafness syndrome with blindness, dystonia, fractures, and mental deficiency is linked to Xq22, **257**

Y
Y mosaicism, Detection of Y mosaicism in patients with Turner's syndrome: *letter*, **578**
Y specific growth gene(s), Chromosomal localisation of a Y specific growth gene(s), **572**
Yeast, Cell cycle regulation and signal transduction mechanisms in yeast: the relevance to human disease, **136** *abs*

Z
Zimbabwe, Oculocutaneous albinism among schoolchildren in Harare, Zimbabwe, **859**
